

PRIME DATABASE GROUP

PRIME Database Group is an 'information management' specialist. While its flagship product is PRIME Database, the Group has also developed several other unique websites. It now also provides a variety of services including database creation and management, content generation, website development and management, information consulting and data cleaning and standardization. By leveraging our deep understanding of information management, our clients are able to take better business decisions, improve their internal information processes and systems, and also significantly enhance their public information platforms.

Innovation has always been a key mantra at PRIME. Almost all databases/websites conceptualized and developed by PRIME are path-breaking and are the worlds' first and unreplicated. PRIME also understands creating value in information that people would be prepared to pay for, and in developing modular formats on websites to achieve a wider client base.

PRIME has over 20 years of extensive experience in dynamic sourcing, aggregation, standardization and distribution of information, with focus on database creation and maintenance. Across all databases, it presently manages over 1 million records.

To summarise, PRIME's expertise lies in:

- Identifying information gaps in the marketplace
- Creating value out of information
- Database creation and maintenance
- Website creation and maintenance
- Data sourcing, mining, structuring, cleaning and standardization
- Creating systems for data capturing and validation
- Developing control systems for ensuring timely data sourcing and timely updation on the websites

Our clients include developmental institutions, banks, corporates, stock exchanges, FIs, asset management companies, stock brokers, academic institutions and the like.

A large number of services of the Group are also focused towards investor education and protection.
